

Automatic Transfer Switches (ATS) are key components in any standby electrical power system and, as such, reliability and confidence in operation is paramount.

KDS offers a wide range of solutions to address this need, in order to facilitate a 'trouble free' transfer of essential loads and electrical distribution systems from one power source to another.

These solutions are suitable for mains/mains or mains/generator applications and range from industrial ATS cubicles to units incorporated into distribution switchgear.

TECHNICAL INFORMATION:

- ▶ 20A TO 6300A
- ▶ AUTOMATIC
- ▶ MAINS/MAINS OR MAINS/STANDBY GENERATOR
- ▶ MECHANICALLY AND ELECTRICALLY INTERLOCKED
- ▶ CONTACTORS OR MOTORISED CIRCUIT BREAKERS
- ▶ SEPARATE CUBICLES OR INTEGRATED INTO SWITCHGEAR WITH OR WITHOUT OVERCURRENT PROTECTION

OTHER OPTIONS:

- ▶ METERING
- ▶ MANUAL OVERRIDE
- ▶ BESPOKE CABLING ARRANGEMENTS
- ▶ BMS STATUS
- ▶ GENERATOR CONTROL
